With a series of signature events throughout December, the **34th annual Festival of Trees** will bring the 2019 holiday season to life in Greenville. Spectacularly decorated trees line the entranceway of *four* hotels in downtown Greenville, giving visitors and community members the chance to experience the magic of the holidays. The **Martinis & Mistletoe** cocktail party is a don't-miss way to kick off the season and the **Teddy Bear Luncheon** is a childhood favorite that offers a morning with Santa for the whole family.

More about this year's beneficiary – The creation of a free-standing Bon Secours St. Francis Neurosciences Center, led by Dr. Kathleen Woschkolup, will give Upstate South Carolina **a comprehensive Neuroscience Program that will provide a multidisciplinary approach to the diagnosis, treatment and management of multiple neurological disorders including Parkinson's disease – something that does not exist in our area.**

Currently, patients seeking in-depth, proven treatment options must travel 2 hours or more to larger academic organizations. This creates a significant opportunity for an area cited as one of the fastest growing cities in the US.

Additionally, there is currently a major gap in the supportive care services for the patients diagnosed with Neurologic conditions who have unique psychosocial, emotional, vocational and educational needs. Funding efforts would support development of a dedicated center for this unique population to assist with meeting these needs. The ultimate goal for the creation of a multidisciplinary care team and center is to improve symptoms, slow progression, reduce anxiety through education, create accessibility to care teams, and improve overall well-being for patients with these diagnoses.

This facility of healing and hope will be located on the St. Francis millennium campus directly behind the St. Francis Cancer Center and will allow neurological care to be provided at one location.

The St. Francis Festival of Trees has been a highlight of the holiday season since 1986 and **we invite you to join us as we bring together businesses and community members to support the Neurosciences Center.**

Enclosed you will find renderings illustrating the center.
